

PAHASARA RIDMAKA

Phone: +94702080762 | Email: pridmaka@gmail.com | Location: Panama, Sri Lanka | Web: pahasara.me
LinkedIn: linkedin.com/in/pahasara-ridmaka | GitHub: github.com/pahasara-ridmaka

PROFESSIONAL SUMMARY

Fresh ICT graduate with a strong foundation in mathematics and physics, combining analytical rigor with hands-on project experience in full-stack development and data engineering. Built end-to-end applications using React, FastAPI, and PostgreSQL, and designed ETL pipelines with Apache Airflow and dbt. Passionate about Linux, open-source technologies, and building scalable, efficient systems. Eager to apply technical skills and problem-solving mindset in a collaborative engineering role.

EDUCATION

University of Sri Jayewardenepura

B.Sc. in Information and Communications Technology

Sri Lanka

May 2026

- **Relevant Coursework:** Data Structures & Algorithms | Object-Oriented Programming | Database Systems & Administration | Computer Networks | Software Engineering | AI | UI/UX Design | Software Architecture | Software Quality Assurance | Data Mining & Warehousing | Linear Algebra | Calculus | Statistics

PROJECTS

E-Commerce Data Transformation Pipeline [Github Link]

July 2026

Python · dbt (Data Build Tool) · DuckDB · Streamlit · SQL

- Architected an analytics warehouse using dbt and DuckDB, implementing a modular ELT pipeline with staging, intermediate, and mart layers following best-practice data modeling patterns
- Designed and built 4 staging models to clean and standardize raw CSV sources (users, products, orders, promotions) with data quality tests using dbt_expectations (uniqueness, not-null, type validation)
- Created 3 intermediate models for data enrichment (orders enriched with product details, inventory status tracking), enabling reusable business logic across multiple downstream analyses
- Published 4 mart models (dim_users, dim_products, dim_promotions, fct_orders) as analytics-ready tables, supporting sales performance tracking and customer behavior analysis
- Built an interactive Streamlit dashboard that queries the DuckDB warehouse, displaying key e-commerce metrics with real-time data visualizations (Plotly)
- Automated the entire workflow with a single dbt build command, reducing data transformation time by 40% compared to manual SQL scripting
- Integrated dbt_utils package for cross-database compatibility and reusable SQL macros, enhancing code maintainability

Automated End-to-End ETL Pipeline & Health Dashboard [Github Link]

July 2026

Python · Apache Airflow · PostgreSQL · Docker · Streamlit

- Engineered a containerized ETL pipeline using Docker and Apache Airflow, automating daily extraction of public health data from Sri Lankan Ministry of Health PDF reports
- Developed robust PDF parsing scripts with pdfplumber, extracting and structuring tabular data from 50+ unstructured reports with 98% accuracy
- Implemented dual-storage architecture archiving raw data in CSV files while leveraging SQLAlchemy ORM for production-ready PostgreSQL storage, reducing query time by 60%
- Built an interactive Streamlit dashboard enabling real-time dengue trend tracking with automated daily updates
- Configured comprehensive error logging and retry mechanisms, achieving 99.9% pipeline reliability

- Planned expansion: Transitioning dashboard to Django for multi-user access and advanced analytics

Visit Panama Sri Lanka – Tourism Platform

April 2026

[React](#) · [TypeScript](#) · [FastAPI](#) · [PostgreSQL](#) · [Tailwind CSS](#)

- Architected a three-tier, API-driven full-stack application with an asynchronous ORM layer (SQLAlchemy) connecting to a relational PostgreSQL database
- Designed and implemented 12 REST API endpoints supporting tourist search, booking workflows, and operator listing management
- Built responsive user interface enabling travelers to explore 200+ attractions and activities while allowing 30+ local homestay and safari operators to showcase services
- Implemented JWT authentication and role-based access control for secure multi-user operation

ACHIEVEMENTS & CERTIFICATIONS

HackX 9.0 Finalist – University of Kelaniya

Sep 2024

Dialog Axiata PLC | Top 15 / 220+ teams

- Co-founded Team CODE9 and advanced to the grand finale.

Introduction to dbt (DataCamp)

Jul 2026

Associate Data Engineer in SQL (DataCamp)

Jul 2026

Introduction to PySpark (DataCamp)

Jul 2026

Intermediate Docker (DataCamp)

Jul 2026

Introduction to Apache Airflow in Python (DataCamp)

Jul 2026

Introduction to Power BI (DataCamp)

Jul 2026

AWS Academy Graduate - Machine Learning Foundations - Training Badge (AWS Academy)

Jun 2026

AWS Academy Graduate - Data Engineering - Training Badge (AWS Academy)

Jun 2026

AWS Academy Graduate - Cloud Foundations - Training Badge (AWS Academy)

Jun 2026

Postman API Fundamentals Student Expert (PostMan)

Sep 2024

JavaScript Algorithms and Data Structures (freeCodeCamp)

Dec 2023

Post-Conference Workshop Series (PyData Sri Lanka)

Jan 2025

LEADERSHIP & VOLUNTEERING

Computer Science Association (CSA) - USJ

Sub-Editor & Graphic Designer

2025 – 2026

Career Skills Development Society (CSDS) - USJ

Faculty Coordinator

2024 – 2025

TECHNICAL SKILLS

Data Engineering: dbt, Apache Airflow, PySpark, Pandas, NumPy, SQLAlchemy

Programming Languages: Python, JavaScript, SQL, Java, C

Web Development: React, Next.js, FastAPI, Django, REST APIs, shadcn/ui, Base UI

Cloud & DevOps: AWS, Docker, Linux (Fedora), Git, GitHub, GitHub Actions (CI/CD)

Databases: PostgreSQL, MySQL, SQLite, DuckDB

Analytics & Visualization: Power BI, Matplotlib, Streamlit, Figma

Development Tools: VIM, VS Code, Adobe Creative Suite

Data Formats & Methodologies: JSON, XML, Agile, CI/CD Pipelines
